

Fransgård SR-3600 Rotory rake

MADE IN
DENMARK

- Large wheels and many rake arms ensure an optimum result.
- The big flexible and adjustable swath cloth forms a perfect swath.
- The rotatable 3-point hitch provides great flexibility in the work.
- Raking multiple swath or wide spread material.
- Moving and reversal of a swath to a dry place.
- Fast changeover to a narrow transport width.
- Perfect for tearing of both grass, hay and straw.

Fransgård

The 4 pcs. offset wheel is center mounted, which ensure optimal work in the field and provide minimal load on the rake.

The rake is running as semimounted in working position and switched to manual transport

The rake has stepless adjustment of raking height that is set above the gearbox

The rake can be set for transportation or storage without tools.
